

"Better relationship"

Your horse is happier to be with you, stays calmer and listens better so you create a closer team.

"I had to have my Nurtural specially made for my huge Shire and I am very very pleased with it. I have had him since he was a yearling - he is 6 this year.

He has never had a bit in his mouth. I look at Trelawny's mouth, which in comparison to his head is actually quite small, it is so soft and delicate - why would I want to do anything to hurt him? Why would I want to hurt something I love?" Jo

"Better performance"

Regardless of age, ability or aspirations of horse or owner, your horse will be happier to be with you and improve how they work with you.

"Because the cross-under straps cannot become uneven during riding, the bridle is especially safe and control is enhanced.

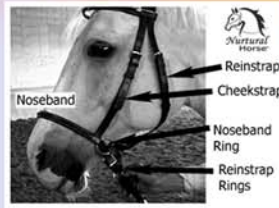

In Use: The horses and riders responded well to this bridle.

Hot horses were controlled and relaxed quickly in this bridle. The Nurtural proved to be able to handle the tasks of controlling horses through varied jumping and schooling exercises with control equal to, or greater, than, in a bit."

Independent Consumer Report - Cinch Magazine

The Nurtural Bitless Bridle is protected by Patents # CA2522524, # 12/066,167US, # PCT/CA2006/001587

Why is the Nurtural Bitless 'Better'?

The Nurtural Bitless Bridle™ sends more signals, and more consistent signals, than bits and other types of bitless bridles.

Our patented Circle-X™ holds the reinstraps securely under the chin, so they stay on the horse's cheek to give more directional control. Our reinstraps do not twist, tangle or pinch the nose. The noseband's rubber gripping gives added contact, stays in place and gets more respect from horses.

You can adjust the length and position of the reinstraps by pulling them through the Circle-X™ and then locking them in the perfect position, loosely waiting your signal. You attach your reins close to the horse's mouth for crisper turning. Try it! You'll see!

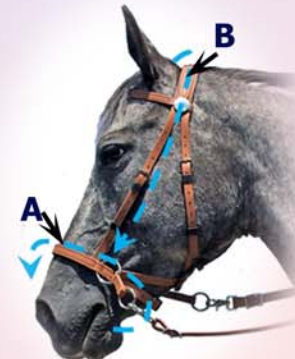

5 Materials, 6 Sizes, English, Western, Driving & Custom
